Mrs. Urška REPOLUSK

Mayor of the City of Ruše

Chair of the Organizing Committee

Dear all,

It gives me great pleasure and it is an honour for me to accept the role of the Chair of Organizing Committee this year's 26th International Air Rifle and Air Pistol Competition.

As a citizen and mayor, I am immensely grateful and proud of the engagement, work and achievements of the Shooting club 1st Pohorski bataljon Ruše puts Ruše, who reap success for success and at the same time place our municipality on the international sports map. Regardless of the club's international recognition, you still tirelessly maintain tradition, connection with home environment and exemplary work with young people, taking care of continuing the tradition.

The past enriches us. Tradition connects us. It is important that even more difficult events make us stronger and more recognizable. This is evidenced by the history of the Pohorje Battalion and the tradition of the club, which is celebrating 70th anniversary.

I would like to use this opportunity to congratulate all members of Shooting Club for their outstanding organization of the international event. I sincerely hope that this competition and good results will motivate the young shooters from Ruše to persevere and continue to contribute to the reputation of our beautiful town.

All the best!

Urška Repolusk, Mayor

S plini Messer do čistejšega okolja

Uporaba CO₂ namesto kemikalij je cenejša, hitrejša, bolj kakovostna in ekološka.

Želite v vašem podjetju močno zmanjšati stroške obratovanja in vzdrževanja s peskanjem s suhim ledom? Želite optimizirati stroške s CO₂? Vas zanima, kako lahko preprečite nabiranje vodnega kamna v cevovodih ali črpalkah s cenejšim načinom, ki je hkrati še ekološko manj sporen kot kemikalije in prav tako preprečuje blokiranje črpalke? Imate v podjetju odpadne alkalne vode, ki jih morate pred izpustom očistiti in nevtralizirati?

Kje vse se uporablja CO₂?

V avtomobilski industriji, jeklarstvu, okoljskem inženirstvu, proizvodnji hrane in pijač, gradbeništvu, metalurgiji, pri obdelavi stekla in keramike, proizvodnji medicinskih in farmacevtskih izdelkov, v kemični industriji, papirni industriji, pri črpanju termalne vode, odpadne industrijske vode, odstranjevanju laka, čiščenju strojev, ...
